Summary

Analytical and results-driven **Data Scientist** with a strong background in Machine Learning, Data Analysis, and NLP. Passionate about transforming data into actionable insights to drive business decisions. Proven ability to deliver data-driven solutions that improve accuracy and efficiency by measurable margins.

Education

Bachelor's Degree in Computer Science — Faculty of Computers and Artificial Intelligence, Cairo University
Cumulative GPA: **3.91 / 4.00** (2022 – 2026)

Experience

Data Science Trainee — Digital Egyptian Pioneers Initiative (IBM Curriculum) July 2025 – August 2025

- Analyzed and preprocessed large real-world datasets using **Pandas** and **NumPy**, improving data quality for model training by handling missing values and outliers.
- Created visualizations and dashboards with **Matplotlib**, **Seaborn**, and **Streamlit** to communicate findings and model performance to a non-technical audience.
- Built, trained, and evaluated supervised and unsupervised **machine learning models** using **Scikit-learn** for classification and regression tasks.

Projects

Sales Forecasting and Optimization (Team Project) [GitHub](#)
– Forecasted weekly sales for retail stores using time-series models **XGBoost**, **LightGBM**, **LSTM**, achieving accuracy **98%**.

- Performed **EDA**, **interactive Dashboards** and **Model deployment**

Material Stream Identification System (Machine Learning) [GitHub](#)
– Developed an Automated Material Stream Identification (MSI) System using fundamental Machine Learning (ML) techniques.

- Performed **Data Augmentation**, **Feature Extraction**, **Model development and deployment** achieving accuracy of **89%** using **SVM**.

SMS Spam Classifier (Machine Learning, NLP) [GitHub](#)
– Developed an NLP pipeline and ML model achieving **98% accuracy** in classifying SMS messages as spam or ham using.

IMDB Movie Review Sentiment Analysis (NLP, Deep Learning) [GitHub](#)
– Implemented sentiment classifier achieving **88% test accuracy** on IMDB dataset.
– Preprocessed 50K reviews with **NLTK**, **Tokenization**, and **TF-IDF vectorizer**).

Music Store Data Analysis (Data Analysis) [GitHub](#)
– Analyzed 10K+ sales records using **SQL** and **Python**, identifying top-selling artists and regions.
– Generated insights that could increase promotional efficiency by 20% if applied.

Certifications

Associate Data Analyst in SQL — DataCamp
GitHub Foundations — DataCamp
Natural Language Processing in Python — DataCamp

Technical Skills

Programming Languages: Python, SQL, Java, C++, JavaScript
Libraries & Tools: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Streamlit, NLTK, spacy, Git, GitHub
Concepts: Machine Learning, NLP, Data Visualization, Feature Engineering, Model Evaluation, Data Cleaning.

Soft Skills

Problem Solving, Collaboration, Time Management, Adaptability.
