## Summary

Computer Science student with a strong foundation in building robust, full-stack applications, now focused on applying those skills to design and deploy scalable data pipelines and machine learning models. Passionate about leveraging engineering principles to solve complex data problems and deliver data-driven products.

---

## Education

**Cairo University.**

*Senior student at Faculty of Computers and Artificial Intelligence – Information Systems Major. (2022-2026)*

**Cumulative GPA:** 3.91/4.00

---

## Skills

- **Languages:** C++, Python (Pandas, NumPy, Scikit-learn, Matplotlib), Java, PHP, JavaScript, SQL.
- **Frameworks & Libraries:** Django, Django REST Framework (DRF), Spring Boot, Laravel.
- **Databases & Tools:** PostgreSQL, MySQL, Oracle 19c, Git, GitHub.
- **Concepts:** Machine Learning, Data Analysis, OOP, Data Structures, Algorithms, REST APIs, Database Administration.

---

## Projects

- **Quiz Management System | (Django, HTML, CSS, JS, DRF)**
  - Developed a full-stack web application enabling teachers to create timed quizzes and students to take them with auto-evaluation and result reporting.
- **Sales Forecasting and Optimization Project | (Python, Machine Learning, EDA) – team project**
  - Built and deployed a machine learning model to predict product demand, improving forecast accuracy.
- **Learning Management System (Java Spring Boot) – Team project.**
  - Collaborated with a team of 5 to develop core backend services for an educational platform. Implemented assignments submission and grading mechanism.
- **Credit Card Approval Automation | (Python, Machine Learning, Logistic Regression) – 88% accuracy.**
  - Built a predictive model to automate bank credit card approvals using Logistic Regression.
- **Smart Appointment Booking System (Spring Boot, SQL)**
  - Developed backend for intelligent scheduling system that optimizes appointment booking using real-time data.
- **Event Booking System (Django, HTML, CSS, JS)**
  - A full-stack web app for browsing, booking, and managing events with an integrated admin panel.
- **Music Store Data Analysis | (Python, SQL, Pandas)**
  - Analyzed music sales data using Python and SQL, identifying top-performing genres and customer purchasing patterns.

---

## Work Experience

- **Data Science Trainee | *Digital Egyptian Pioneers Initiative (IBM Curriculum)* July 2025 – present**
  - Analyzed and preprocessed large, real-world datasets using **Pandas** and **NumPy**, improving data quality for model training by handling missing values and outliers
  - Created data visualizations and dashboards with **Matplotlib**, **Seaborn** and **Streamlit** to communicate findings and model performance to a non-technical audience.
  - Build, trained, and evaluated **supervised** and **unsupervised** machine learning models using **Scikit learn** for classification and regression tasks.
- **Database Administration Intern | **e& Egypt** Aug 2025 – Sept 2025**
  - Gained hands-on knowledge in **Oracle Database Administration and Architecture**.
  - Completed the **Oracle Database 19c Administration Workshop**, covering installation, configuration, and management.
  - Performed practical tasks related to **database creation, user management, backup, and recovery** as part of the workshop.

---

## Certifications & Courses

- Oracle Database 19c Administration Workshop – *e& Egypt*
- SQL Fundamentals Track – *DataCamp*
- Associate Data Analyst in SQL - *DataCamp*
- The Complete 2024 Web Development Bootcamp – *Udemy*
- Fundamentals of Backend Engineering – *Udemy*
- GitHub Foundations – *DataCamp*

---

## Extracurricular Activities

- **Google Developer Student Club (GDSC)** – UI/UX Committee Member (*Feb 2024 – July 2024*)
- **Microsoft Student Partner Tech Club (MSP)** – Web Development Committee (*April 2024*)
